

GATTO

Gatto Mini Excavator is a multifunctional and innovative Mini Excavator suitable for both construction and remediation activities. The machine shows its best skills working in confined spaces and areas suspected of pollution and contamination. It is the right solution for safer operations at safe distance.

It can be equipped with a Suction Configuration, which helps the Mini Excavator to be connected to any Suction Unit (Vacuum Trucks, Suction Excavators, Industrial Pumps, etc.). It can also be equipped with a Remote Control System, to make the excavator totally remote and wireless controlled, and with various tools that can be mounted on the power arm.

FEATURES

- Two hydraulic driven rubber tracks
- Hydraulic Manual Manifold mounted on board for controlling the machine
- Man-on-board configuration
- Quick connectors to the hydraulic source

SUITABLE TO WORK WITH

- Vacuum Trucks
- Suction Excavators
- Industrial Aspirators
- Dust Aspirators

APPLICATION FIELDS

Ideal for the removal of material in:

- **TUNNELLING**
- **SIPHONS CLEANING**
- **BIG SEWER PIPES**
- **TANKS**

OPTIONAL

Camera System Available

GATTO RC

Battery Driven Version Available

ADVANTAGES

- Reduction of labour
- Working time reduction
- Safe operations in confined spaces
- Accurate and precise interventions

TECHNICAL DATA

The R&D Department is at disposal to customize the products according to the most various needs.

OPTIONS GATTO MODELS

INTERCHANGEABLE TOOL ACCORDING TO VARIOUS NEEDS

HOSE REEL

Tools for improving the performance of all models of Gatto Mini Excavator. Some tools are attachable to the arm of the Gatto and have been designed for better removing different types of material; some others modify the structure of the Gatto adapting it to different working environments.

The R&D Department of Gerotto is continuously searching for new and quick solutions to the cleaning application.
